

How to communicate effectively in virtual space?

Problema:

In today's world, virtual communication is an integral part of everyday life. How can we communicate effectively and creatively in virtual space, especially using a foreign language? Your task is to create a short 1-2 minute English-language video (interview or reportage) about a school event using virtual communication tools to demonstrate your communication and technical skills.

Projekto užduotis mokiniams:

- ⊗ ⊙ ☆ 1. **Choosing an event and creating a script.** Choose a recent or upcoming school event. Create a short script (1-2 minutes) for your video, outlining who will be interviewed (in the case of an interview) or what information will be provided (in the case of a report). The script must be in English.
- ⊗ ⊙ ☆ 2. **Choosing and using virtual communication tools.** Choose the most appropriate virtual communication tools (e.g. videoconferencing platforms, screen recording applications, video editing applications) for your video. Record your interview or report using the tools of your choice, taking into account the audio and video quality.
- ⊗ ⊙ ☆ 3. **Editing and editing your video.** Edit and edit your video to make it smooth, informative and visually appealing. Make sure that the video is of the specified length (1-2 minutes) and that there are no unnecessary pauses or mistakes.
- ⊗ ⊙ ☆ 4. **Accuracy and fluency of the English language.** Pay attention to English grammar, vocabulary and pronunciation. Try to speak clearly and fluently so that your message is easily understood by the audience.

⊗ ⊙ ⊛ 5. **Presentation and reflection.** Present the video you have made to your classmates. After the presentation, reflect briefly on what went well, what challenges you faced and what you learned about virtual communication and collaboration.

Įsivertinimo laukeliai kviečia pagalvoti kaip buvo atliktos užduotys: nesėkmingai, sėkmingai ar labai sėkmingai?

Mokiniai žymi labiausiai užduoties įgyvendinimą atitinkančio laukelio vidurį, pvz.: ⊗ ⊙ ⊛

Mokytojai vėliau gali apvesti jų manymu tinkamiausią laukelį, pvz.: ⊗ ⊙ ⊛

Mokomos temos:

-**Informatics.** Virtual communication tools.

-**Life Skills.** Collaboration and Communication: Students will develop collaboration and communication skills by working in teams and solving problems.

- 28.20.2 Making films, reports, video and audio recordings: Students will learn to make a short film, report, interview about people they know or have known, things they have experienced, important events (e.g. famous people, public events, places of interest, etc.).
